

Digital Connectivity Infrastructure Accelerator – Digital Platform Solutions and professional services providers’ input into technical specifications for a Digital Platform

August 2021

Questions and Answers

Date: 27 July 2021

1. Q: Will the Smart Infrastructure Standards (PAS1 and 2) cover data security as well as physical security?

A: Yes, both data and physical security are within the scope of the two PAS documents.

2. Q: Will Local Authorities be mandated to use the tool or will it be voluntary?

A: Any policy decisions specific to national adoption of Digital Platform solutions will be informed by the outcomes of forthcoming pilots.

3. Q: To enhance agility should the core co-development team be less institutional?

A: The aim of the co-development group is to gather views directly from the end-users on the key requirements for Digital Platform solutions. It's unclear what the comment on agility refers to. We welcome further clarification of the question.
