Building our Industrial Strategy

Organisations: [Department for Business, Energy & Industrial Strategy](#)

Brighton's 5G testbed is 'the start of something special' for UK

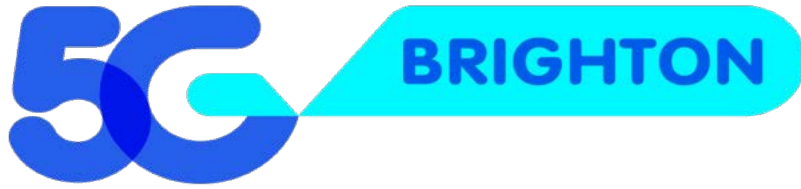

[Dr Jeremy Silver](#), 30 October 2018 - [AI and data](#), [Business environment](#), [Good work](#), [Grand Challenges](#), [Ideas](#), [Infrastructure](#), [Places](#)

Guest post by Dr Jeremy Silver, Chief Executive Officer of the Digital Catapult.

About this blog

Our modern Industrial Strategy sets out a long term plan to boost the productivity and earning power of people throughout the UK.

This blog explains what we're doing and showcases the stories of businesses, academia and civil society working to make the Industrial Strategy a reality.

- Funded by Coast To Capital LEP and Digital Catapult Brighton
- Delivered by Wired Sussex, Brighton Dome and Digital Catapult
- Located at the FuseBox, Brighton Dome and DC London
- Has access to Brighton Immersive Lab and Brighton Festival

For Small and Mid-sized Enterprises

The SME innovation opportunity:

- Productivity
- Employment
- Growth

The SME innovation challenge:

- Capacity
- Exacerbated for 5G and other emerging tech

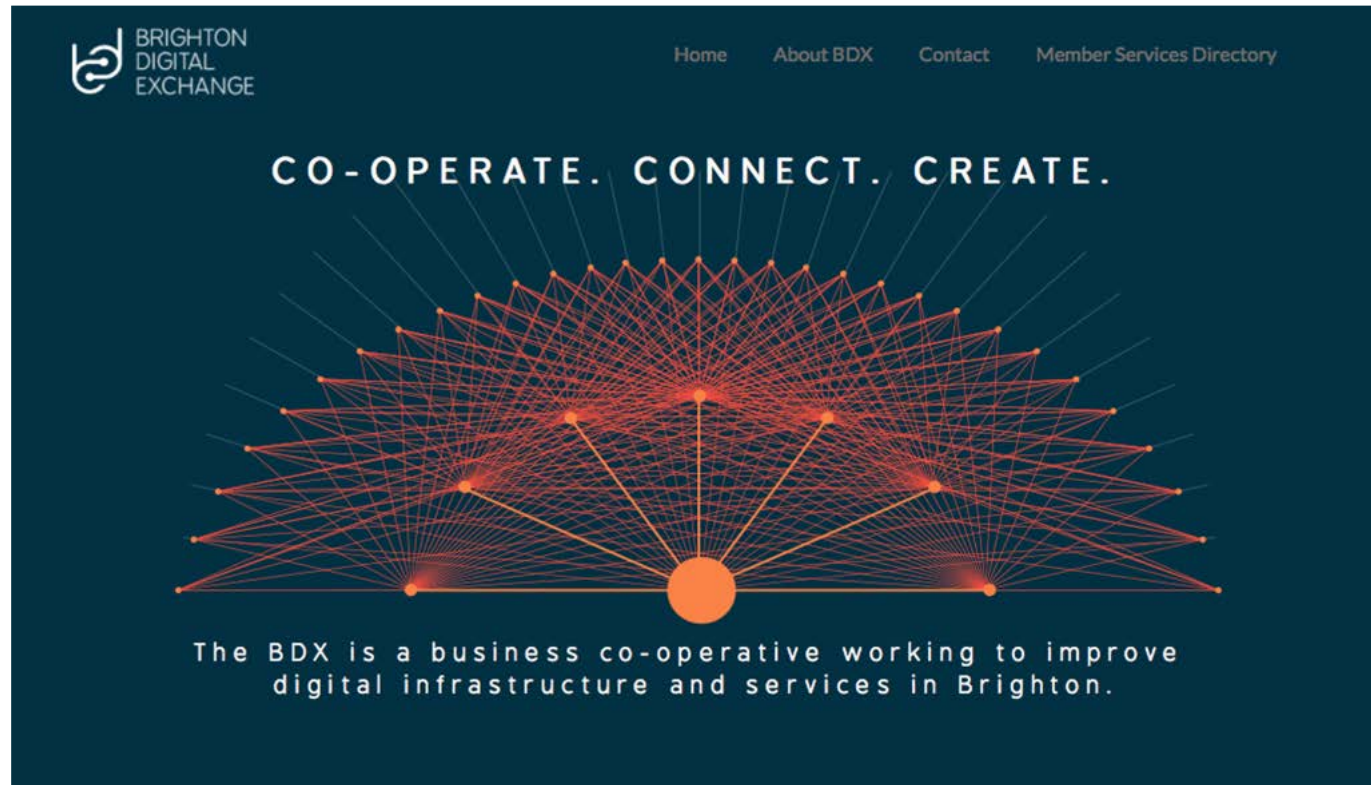

How 5G Brighton works:

- Cohorts
- Testbed Accelerator Programme
- Suppliers and Supply chains
- Sectoral Focus

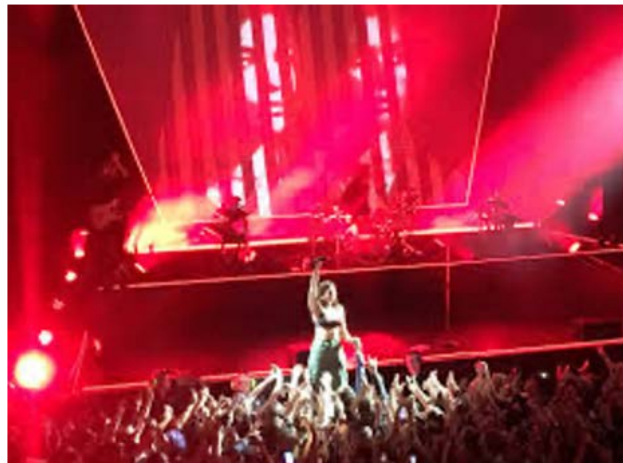

Independent

- Network neutral
- Powered by Brighton Digital eXchange

Permanent (the Distributed Testbed model)

- 5G technology is embedded into 2 locations – the FuseBox and Brighton Dome.
- The FuseBox delivers support to proof-of-concept stage and the Dome provides real world market testing opportunities.
- This enables us to create a centre of excellence, growing our 5G expertise
- New additional support from C2C LEP and BHCC will enable extension / enhancements

Please talk to us,
especially if you have
cultural and creative companies
who are interested in engaging with
5G Brighton
